

BEAD Program Impact Assessment

1 Eligible Locations

How many unserved/underserved locations are eligible for BEAD funding?

3% 11K LOCATIONS OF HAWAII LOCATIONS LACK HIGH-SPEED BROADBAND IN JUN 2023

VS. 9% STATE/TERRITORY AVERAGE

UNSERVED LOCATIONS, JUN. 2024

5.9K LOCATIONS

Are estimated to lack broadband access at **25/3 Mbps**

UNDERSERVED LOCATIONS, JUN. 2024

0.7K

Are estimated to lack broadband access at 100/20 Mbps

These locations are primarily in rural areas and are eligible for BEAD funding to deploy broadband service.

Total Funding

How much capital funding is the State/Territory estimated to have?

\$149M

IN BEAD FUNDING HAS BEEN ALLOCATED TO HAWAII

VS. \$743M STATE/TERRITORY AVERAGE

ESTIMATED BEAD FUNDING:

BEAD Funds allocated by NTIA

\$149M

Estimated Provider Match

\$20M

Estimated Total Capital

\$169M

The provider match is estimated using a high-level service provider business case. See national summary deck for full details.

3

Deployment

How many locations can be covered with fiber and other technologies?

\$16M-\$149B OF BEAD FUNDS IS REQUIRED TO BUILD HIGH-SPEED BROADBAND TO ALL ELIGIBLE LOCATIONS

Estimate Eligible Locations

Hawaii | Estimated Eligible Locations for BEAD Projects

	Unserved (less than	Underserved (less than	Location Distribution in June 2024
June 2023 FCC Broadband Locations	25Mbps/3Mbps) 9.7K	100Mbps/20Mbps) 0.8K	Served Underserved Unserved 309.0K
 Subsidy Program Funded Locations¹ 	3.0K	0.1K	6.6K B 0.7K 0.2% of locations are underserved
Incremental Build ² (13% annual build, for 12 months)	0.9K		6.6K 1.9% of locations are unserved Hawaii
Jun. 2024 Estimated Eligible Locations	5.9K A	0.7K B	We estimate 2% of locations will be eligible for BEAD Project Funding in Hawaii

^{1.} Locations with "commitments" to receive support from federal subsidy programs

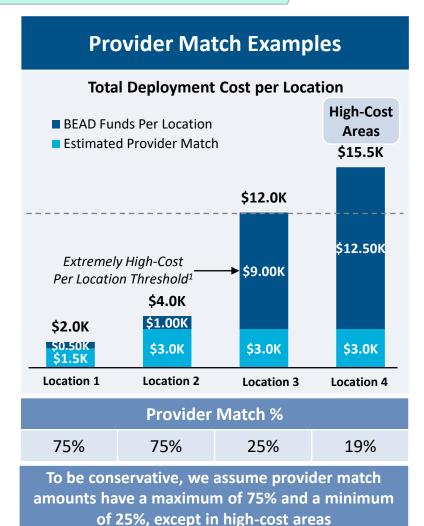

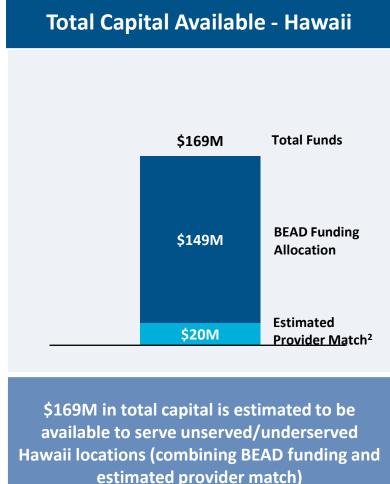

^{2.} Given the uncertainty around the magnitude of locations moving from unserved to underserved, we have not made incremental builds adjustments to underserved locations BEAD eligible locations does not account for state-specific eligibility rules set forth in Initial Proposals Source: Cartesian, FCC National Broadband Map (June 2023 data, released in November 2023)

Calculate BEAD Funding

Hawaii | BEAD Funding & Estimated Provider Match

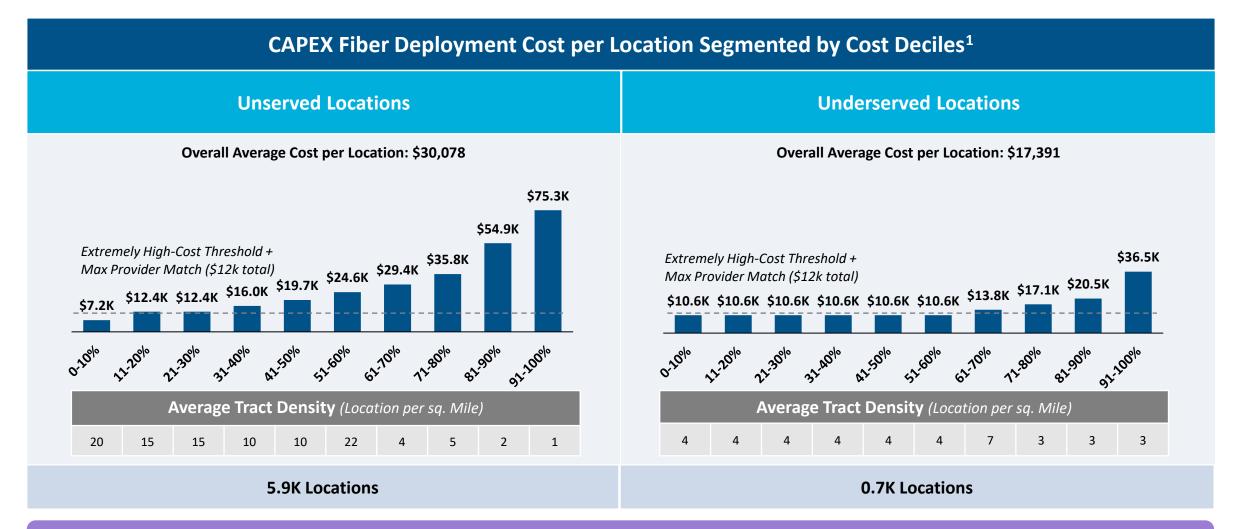

^{1.} The model uses a \$9k threshold, however, States/Territories will individually need to determine their appropriate extremely high-cost threshold

^{2.} In reality, providers will determine the viable level of match funding for each project using a business case model. They will be willing to contribute a greater match in some locations and less in others. Locations which are hardest to serve may need to be fully funded by BEAD with no match. Competitive bidding should drive provider matches towards this level. Source: Cartesian, FCC National Broadband Map (June 2023 data, released in November 2023), Benton, NTIA

Hawaii | Cost to Deploy Fiber by Decile

Over 15% of locations are estimated to fall below the High-Cost Threshold + Provider Match

SCENARIO:

1

Baseline Fiber Deployment

PRIMARY ACCESS TECHNOLOGY:

Below High-Cost Threshold

Above High-Cost Threshold

FIBER

FIXED WIRELESS

Fiber is first deployed to unserved locations below extremely high-cost threshold, from least expensive to most

If there are funds leftover...

Unserved locations above the extremely high-cost threshold are then served with fixed wireless

If there are funds leftover...

Remaining funds used to deploy fiber to as many underserved locations below the high-cost threshold, while retaining enough funds to serve remaining underserved locations with fixed wireless

OUTCOME:

FUNDING

PRIORITIZATION:

More funding for other eligible programs

2 Maximum Fiber Deployment¹

Below High-Cost Threshold

Above High-Cost Threshold

FIBER

FIBER & FIXED WIRELESS

Fiber is deployed to low-cost areas first across both unserved and underserved locations

As many locations as possible are served with fiber, while leaving budget for fixed wireless when 100% fiber coverage is not possible

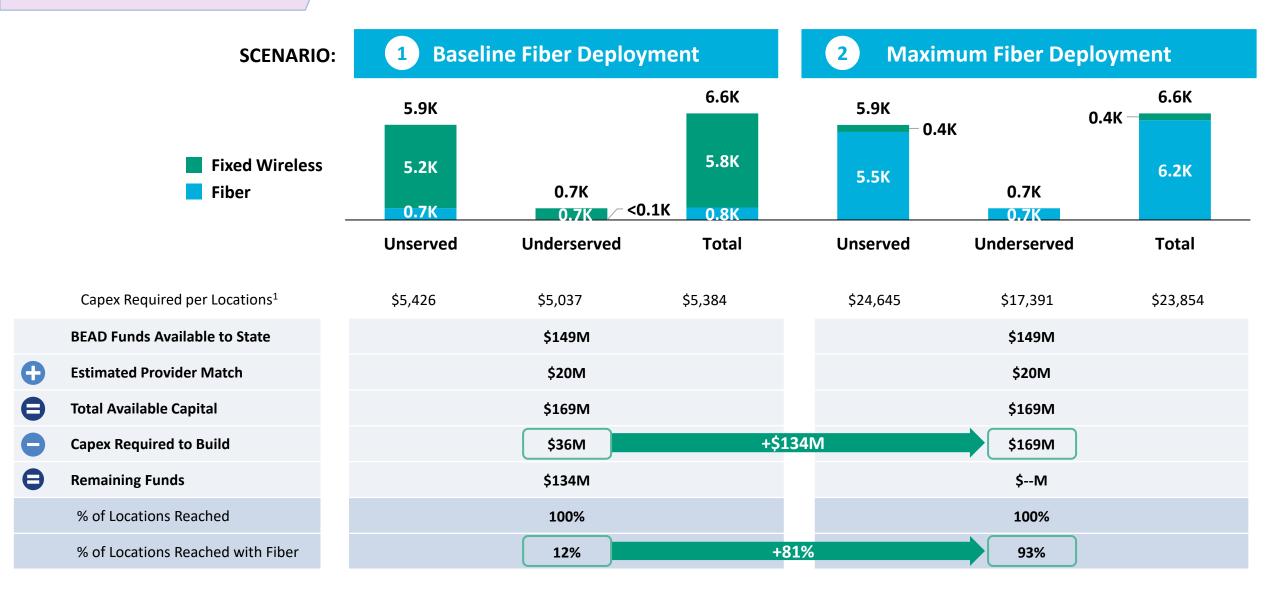

More locations reached with fiber

Develop Deployment Scenarios

Hawaii | Scenario Analysis Results

^{1.} Funding to deploy fiber before the maximum \$3k provider match per location

Source: Cartesian, FCC National Broadband Map (June 2023 data, released in November 2023), Benton, NTIA

Hawaii | Conclusion

Funding Summary

Key Findings

Hawaii is expected to receive

\$149M in BEAD funding

\$20M in estimated provider matching

We estimate the funding is sufficient to reach all of Hawaii's 6.6k eligible locations with high-speed broadband

Hawaii will need to decide how far to deploy fiber while considering the trade-off of having higher fiber coverage vs. retaining funds for other BEAD eligible programs

A Baseline Fiber Deployment...

Maximizing Fiber...

- Leaves \$134M additional funds for affordability programs
- Reaches 12% of locations with fiber
- Requires 88% to be reached with other tech.

- Exhausts funds without leaving additional funds for affordability programs
- Reaches 93% of locations with fiber
- Requires 7% to be reached with other tech.

States/Territories will set their own extremely high-cost threshold and may choose a threshold or funding paradigm different from these two scenarios
